The right product for optimal use

Find the tapware you need at a glance. This is what ECAU classification offers for sanitary tapware.

Make easy choices with ECAU classification based on 4 performance criteria, represented by icons and the A-to-D rating scale (A is the best).

These performance criteria let you choose your tapware based on water saving, hot water energy saving, sound level and sturdiness that determines life expectancy.

Choosing an ECAU-rated product means getting one that meets all your requirements, on all levels

Performance displayed on labels and packaging

The image shows the ECAU logo at the top right. Below it is a performance scale with four rows of icons and ratings:

- ECO icon: A (green), B (grey), C (grey), D (grey)
- € icon: A (grey), B (grey), C (yellow), D (grey)
- Speaker icon: A (grey), B (green), C (grey), D (grey)
- Hourglass icon: A (green), B (grey), C (grey), D (grey)

At the bottom of the scale, the text reads: **E00 C1 A2 U3**
Product awarded NF 077 certification **CSTB** le futur en construction

E for Water saving
Flow rate

C for Comfort – Energy savings
Resistance to water hammers, hot water energy saving

A for Acoustics
Sound level generated by tapware

U for Durability
Life expectancy of moving parts of faucets

Benefits to businesses and consumers

Manufacturers

Your products are promoted at the point of sale to differentiate them, with a trusted display by the CSTB.

Merchants and distributors

ECAU displayed on your shelves, with icons on labels that make choosing easier and faster for higher customer satisfaction.

Housing operators and public and private clients

The performance levels for sanitary tapware are adapted to each construction project based on the requirements of your customers, levels of quality in your calls for tender and the specific operating environment.

Consumers

ECAU lets you choose at a glance products that meet all your requirements for water saving, hot water energy saving, acoustic comfort and life expectancy.
